

able and just that I had no difficulty in making them comprehend it, and it in a great measure silenced the clamor raised by their evil advisers.

In allowing the Indians to retain reservations of land for their own use I was governed by the fact that they in most cases asked for such tracts as they had heretofore been in the habit of using for purposes of residence and cultivation, and by securing these to them and the right of hunting and fishing over the ceded territory, they cannot say that the Government takes from their usual means of subsistence and therefore have no claims for support, which they no doubt would have preferred, had this not been done. The reservation at Garden River is the largest and perhaps of most value, but as it is occupied by the most numerous band of Indians, and from its locality (nine miles from the Sault) is likely to attract others to it, I think it was right to grant what they expressed a desire to retain. There are two mining locations at this place, which should not be finally disposed of unless by the full consent of Shinguacouse and his band; they are in the heart of the village and shew no indications of mineral wealth, they are numbered 14 and 15 on the small map appended to Messrs. Anderson and Vidal's report. I pledged my word on the part of the Government that the sale of these locations should not be completed, and as the locatees have not, I believe, complied with the conditions of the Crown Lands Department there can be no difficulty in cancelling the transaction.

The chiefs are desirous that their several reservations should be marked by proper posts or monuments, and I have told them the Government would probably send some one next spring for that purpose. As I know many of the localities I shall be able to give the necessary information when required.

When at Sault Ste. Marie last May, I took measures for ascertaining as nearly as possible the number of Indians inhabiting the north shore of the two lakes; and was fortunate enough to get a very correct census, particularly of Lake Superior. I found this information very useful at the council, as it enabled me successfully to contradict the assertion (made by those who were inciting the chiefs to resist my offers) that there were on Lake Superior alone, eight thousand Indians. The number on that lake, including eighty-four half-breeds, is only twelve hundred and forty—and on Lake Huron, about fourteen hundred and twenty-two, including probably two-hundred half-breeds; and when I paid the Indians they acknowledged they knew of no other families than those on my list.

The number paid, as appears on the pay list, does not show the whole strength of the different bands, as I was obliged at their own request to omit some members of the very large families. I have annexed to this Report the names of the chiefs, their localities, and number of souls in each band as recognized by me in apportioning the money, thinking it will be useful when paying the annuity hereafter.

This information may I believe be fully relied on for Lake Superior, but the census for Lake Huron is not so perfect; and I would suggest that Captain
